

Report on Adopting Neighbourhood Park

Eco Club

Adopting a Park is a great way to unite neighbours and to help maintain and beautify surroundings. With the air pollution index reaching above 700 in Delhi and as a part of sustainable development, Red Roses Public School, Saket has shown a keen interest in adopting a neighbourhood park. The Hon'ble school principal Dr. Anuradha Mehta donated 50 plants and trees to the park in Saket, E- Block under **Seed Donation Camp**. RWA President Mr. Sandeep Bidhuri along with his team extended full support to this noble cause. Flowering plants like *Guldavri*, *Champa*, *Cockscomb* along with the medicinal plants like *Aloevera*, *Neem*, *Pattharchattaet* were planted in the park. Tree plantation has essentially become significant in this current age of climate change and global warming. Trees take in the carbon dioxide as well as many toxins and give out clean oxygen for all living things to breathe. Red Roses Public School is compassionate to be an active participant in making this world a better place and also intend to sensitize its students towards mother earth. The school is committed to provide necessary support and help in tending the garden, removing invasive vegetation and keeping a general eye on the park.
